T_FLASH

Please refer to design notice to get better MSDC signal quality

SIM

MICRO SIM1

NANO SIM2

Schematic design notice of "40_MEMORY_SD Card" page.

Note 40-1:

The total equivalent capacitance of MSDC ESD protection device and de-sense bypass CAP must be <=10pF.
But for NFC app, equivalent capacitance of MSDC_NFC_SWPIO and MSDC_NFC_VCCSWP should <=0.5pF.

KEY

DO NOT put pull-up resistor on PWRKEY
ε*~u0u0Äu0,üðÄ°Äε~FPC>ßTßε±ðε°Ä~Äu0,ü³ðÄ°Ä~ε~ε~°üüPAD°Ä~üüü~εð

Notice :
FCHR_ENB de-bounce time is around 50ms, so it may have quick-press-miss-key issue (ex: miss key during press key 7 times in 1 sec)
If you have this concern, please change Volume_Down_Key design from FCHR_ENB to KCOLx

Long press to shutdown
5/8/11/14 s with <1% accuracy
There are 3 option:
PWRKEY+HOMEKEY
PWRKEY only(setting by register)
HOMEKEY only(setting by register)

During download mode, default = PWRKEY + FCHR_ENB
For other case (exclude download mode), default = PWRKEY only

Re-start
1.Phone will re-power on if keep long press PWRKEY after system shutdown
2.If has SPAR function,Phone will re-power on after system shutdown
