[illegible]

The schematic diagram illustrates the electrical connections for a sensor module, organized into several functional blocks:

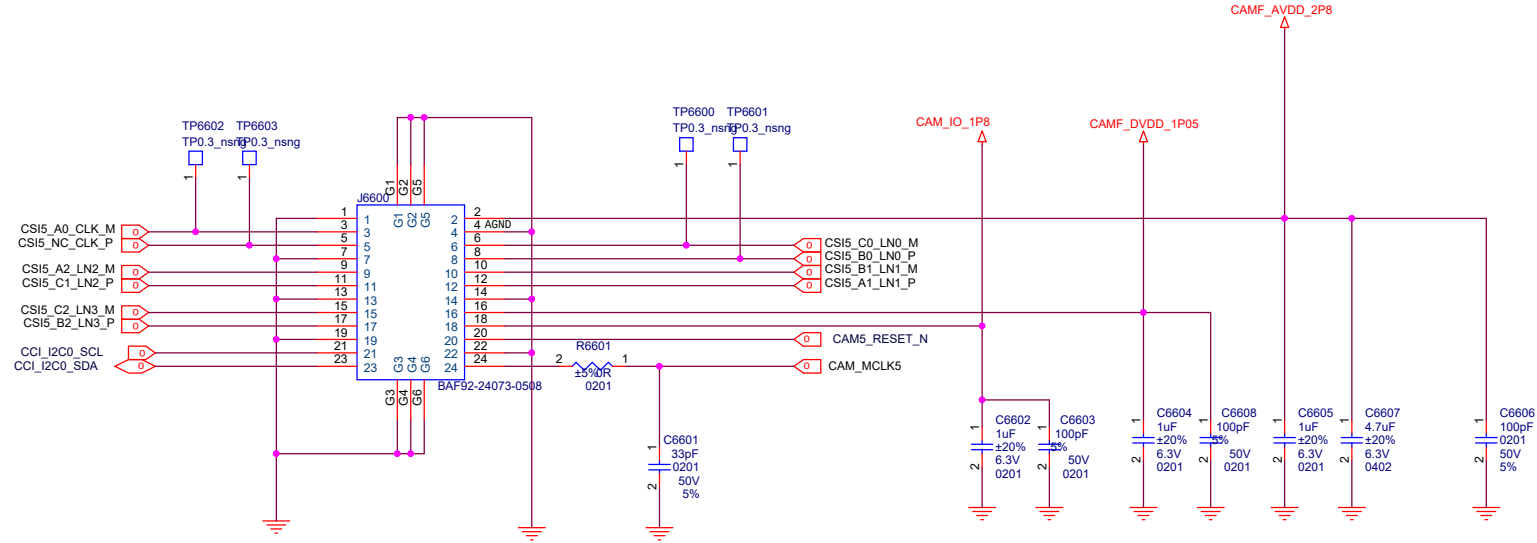

- TOF&Flicker&FLASH&MIC:** This top section contains the main sensor interface. It includes transistors (e.g., R7633, R7632, R6506, R7647, C9077, C9075, C9076, C9080, C9092, C9081, C9082, C9084, C9093, C9094, C9095, C9078, C9079, C9096) and capacitors (C5403, C5404, C5405, C5407, C5426, C5428, C5400, C9085). It also shows connections for TOF\_SPI\_MISO, TOF\_SPI\_CLK, TOF\_SPI\_MOSI, FLASH\_LED2, FLASH\_LED1, and various power and ground pins.
- HALL:** Located at the bottom left, this block features a Hall effect sensor (U6201\_NM) and a bus (BUS2272NUZ) connected to HALL\_OUT1 and HALL\_OUT2.
- SEC\_AMOLED\_ELVD:** This central block manages the AMOLED display's power and data lines, including SEC\_AMOLED\_ELVD, SEC\_AMOLED\_ELVS, SEC\_AMOLED\_VCI\_3P3, and SEC\_AMOLED\_TP\_RST.
- SEC\_BAT\_BtoB:** The bottom right section shows the battery-to-board interface, featuring a battery management IC (J5402, BM25-4S/2-V(51)), a battery (BATT\_SDA), and various capacitors (C5425, C5426, C5428, C5400, C9085) and resistors (R5425, R5426, R5428, R5400, R9085).
- FAIL FIND:** Two "FAIL FIND" labels are present, one near the battery management IC and another near the bottom right corner of the schematic.
- Other Components:** The diagram includes various other components like capacitors (C9077, C9075, C9076, C9080, C9092, C9081, C9082, C9084, C9093, C9094, C9095, C9078, C9079, C9096), resistors (R7633, R7632, R6506, R7647, C9077, C9075, C9076, C9080, C9092, C9081, C9082, C9084, C9093, C9094, C9095, C9078, C9079, C9096), and integrated circuits (U6201\_NM, BUS2272NUZ, J5402, BM25-4S/2-V(51), Q5400, PMDXB600UNE).
